

Air Management Technologies, Inc.

Capabilities Statement

Since 1993, Air Management has delivered innovative turnkey energy and environmental solutions across North America, serving public and private sectors with a full team of engineers, technicians, and partners to optimize cost and performance.

Core Competencies

- Heating, Ventilation and Air Conditioning
- Critical Environments
- Refrigeration and Freezing
- Performance Contracting
- Indoor Air Quality Analysis
- Energy Management
- Facilities Management Systems
- Automatic Temperature Control
- Process Cooling & Heating

Differentiators

We deliver Guaranteed Solutions tailored to client needs, with expert teams ensuring quality, innovation, and focus on both capital and life cycle cost efficiency.

Experience and Qualifications

Air Management delivers superior building energy and environmental services utilizing modern technologies and operates with integrity. The typical size of our building HVAC Guaranteed Solutions are from 1,000 ft² to over 400,000 ft², with most projects around 100,000 ft².

We can operate as an Energy Service Company or partner with others to provide turnkey solutions optimizing HVAC, lighting, compressed air, and process systems. With in-house engineering, construction, controls, and commissioning, we can guarantee projects will operate as specified and within budget. We are consistently recognized for our industry contributions and hold proprietary and patented systems which demonstrate our leadership and innovation.
